

### **Pitsford Water**

Pitsford remains open for bank and boat fishing until the end of January 2021. This includes predator as well as trout fishing. Winter restrictions apply to the access track.

Since November, reports from local anglers have included some good catches off the bank on milder days; especially for those who keep moving. Fishing has been more difficult recently as the temperatures cooled.

As of 21 November, the rod average for the season was 5.4 trout per catch return.

The new trout season at Pitsford commences on Saturday 26 February.

### **Ravensthorpe Water**

Ravensthorpe closed on 31 December and re-opens for trout fishing on Friday 25 February. Unlike in some years, the trout fishing did not really pick up in the Autumn, after the summer heat.
